**Motor was made in China  
It has poor road-holding in wet conditions**

**Europe Machine key:install very easy  
Improve work efficiency**

**VS**  
**3**

**ANSI Machine key:need screws fixed  
behind the mortise,very difficult**

The 6011 RFID hotel lock is equipped with durable contactless card technology, which is insensitive to scratches and magnetic fields. The battery has a high longevity (normal 4pcs AA batteries can use 14 months) and both the locks and cards are low-maintenance. The locks are standard equipped with an emergency cylinder and a special fire prevention card to keep the doors open during an emergency.

*Durable contactless card technology.  
Which is insensitive to magnetic fields and scratches.etc.  
Assembly in Holland,100% own development  
High quality card slot built from  
304 STAINLESS STEEL Components.  
No wear and tear to lock and cards,low  
maintenance.  
Internal memory readout last 830 lock  
opening records.  
Card has extended function, can be used for  
parking, consumption, lift control*
