

Do Not Disturb System

Description:

Do Not Disturb System is described intelligent touch panel device of combination of doorbell and do not disturb and make up signs in hotel guestrooms. Besides doorbell function, the system comprises means for allowing a hotel guest to choose, from within the room, a message to convey to hotel staff and others such as do not disturb or make up. The message is expressed by indicators housed within the touch panel located outside of the guestroom, which are visible clearly to passers-by even in the dark.

LED backlight touch-key achieve switch control. The standard pattern, clear and readily understood, and the light can be directed so the guests could control under any of lights, in line with international hotel trends which is convenient for identification at night.
